## Recommendation on draft Statement of International Cataloguing Principles

- 5.1.2.1 Change “persona” either:
  - (1) another word (i.e, distinctive entity), or
  - (2) add the word to Glossary, with a clear definition
- 5.1.3 Language
  - The language/script of the corporate body, or The language/script of the manifestation?
  - The word “references”: cross-references Or references sources?

## Recommendation on draft (cont'd)

- 5.4.1.1 Direct order and the two exceptions:
  - The phrase: “should begin with or include”
    - Keep as is, (the majority opinion) or
    - Change to: “should begin with”. (one group member)
      - See also exception two (5.4.1.2)
  - Typo – “from” should be “form”
  - Local practices different than principles/rules

## Recommendation on draft - Appendix

- Standardization
  - Keep as is (group opinion)
  - Update to reflect how standardization helps users, not only librarians (sharing records). (one member)

## Glossary

- General suggestion: Arabic glossary should be reviewed extensively.
- Two areas for overall review of the glossary:
  - Add terms: for example,
    - User of the catalog,
    - Persona
  - Delete terms: for example, Agent.

## Principles vs. Rules

- Currently used Rules for “corporate body name-change” are sufficient.
- Also Rules are okay when to make a new authority record for the new name.
- Same thing for references for earlier/later names.
