Problems encountered

- Orders by segments and not by complete titles
- Fast evolution in needs, techniques and file formats:
 - *Reprocessing of the digital files created between 2001 and 2007 (indexation by day, OCR allowing for a search in full text...)*
 - *Roles of the national and international bodies?*

The regional Campaign for the preservation and promotion of the general information press published in Rhône-Alpes

Problems encountered

- Preservation of the digital files in the long term:
 - *Technical and legal matters*
 - *Preservation procedure set up by ARALD in 2007 for the 1,900,000 files concerned*
- Need to consider the issue at national level in order to take it into account in the framework of the policies of heritage preservation
