6.4 Subfield Order

There is no specified order implied in the values of the subfield identifiers. Subfield identifiers are assigned values for identification purposes, not for file arrangement. However, when control subfields are used in the field, they precede all other subfields in that field, except subfields \$2 and \$4. Subfield \$2 follows directly the subfields with the name access point, controlled vocabulary terms, class number, format, etc and subfield \$4 follows the subfields that contain the name access point.
